SOFT SKILLS

Analytical

Collaborative

Solution-driven

Business-minded

Supportive team mentor

LANGUAGES

Ukrainian	**Native**
English	**Fluent**
Russian	**Fluent**

Backend developer focused on ERP-integrated APIs, fiscalization services, and event-driven platforms with production delivery on Linux server infrastructure.

TECHNOLOGIES

Programming & Frameworks

Python 3 | Java | FastAPI | Flask | Django | JavaScript | Frappe

Databases & Storage

PostgreSQL / TimeScaleDB | MySQL / MariaDB | SQLite | Oracle | MongoDB | Redis

APIs & Integrations

REST API | WebSocket API | gRPC | IT-Enterprise ERP API | Software cash register (PRRO) API

Async, Messaging & Infrastructure

Kafka | Celery | RabbitMQ | Linux | Nginx (reverse proxy/load balancing) | Docker | Supervisor/systemd | CI/CD pipelines | VPS administration

WORK EXPERIENCE

Software Developer — March 2023 - Present

JSC Ukrposhta | Kyiv, Ukraine

- Designed backend flows for e-commerce orders and customer lifecycle with IT-Enterprise ERP API integrations.
- Built a Java REST extension for an existing .jar-based Software cash register (PRRO) component used for Posmark online-order fiscalization.
- Implemented event-driven fiscalization services using Kafka, Celery, Redis, and PostgreSQL; handled Linux deployment, Nginx balancing, and CI/CD delivery.

Software Engineer — October 2019 - March 2023

Fintech Startup | Kyiv, Ukraine

- Built automated trading systems on Binance REST/WebSocket APIs using asyncio, SQLAlchemy, pandas, and numpy.
- Developed Telegram alert automation and maintained VPS-hosted services with production Linux administration.

PROJECTS

E-commerce & Order Management

Designed backend systems supporting full order and customer lifecycle for national-scale e-commerce platforms, including ERP integrations and shipment automation.

Fiscalization & Payment Orchestration

Implemented online/offline fiscalization and receipt lifecycle processing via PRRO services with event-driven pipelines on Kafka, Celery, Redis, and PostgreSQL.

Logistics & Warehouse Systems

Designed WMS and pickup/drop-off management services to automate inventory accounting, cargo lifecycle tracking, and customer verification workflows.

National Program Integrations

Delivered secure backend integrations for national initiatives, handling high-volume recipient data and large-scale logistics coordination.

EDUCATION

Bachelor Degree in International Economic Relations — 2009-2013

Institute of International Relations (IIR), Taras Shevchenko State University | Kyiv, Ukraine

MBA, Global Banking and Finance — 2013-2015

European University Business School | Geneva, Switzerland
